CALL FOR PAPERS

## A SPECIAL ISSUE ARISING FROM THE 9<sup>TH</sup> EUROPEAN CONFERENCE ON MINERALOGY AND SPECTROSCOPY

*Guest editors: František Laufek (Czech Geological Survey, Prague)*

*Jakub Plášil (Institute of Physics, ASCR, v.v.i., Prague)*

*Jan Cempírek (Masaryk University, Brno)*

*Radek Škoda (Masaryk University, Brno)*

The 9<sup>th</sup> European Conference on Mineralogy and Spectroscopy (ECMS 2019) will deal with mineralogy, spectroscopy and related fields of science, with a special focus on the interplay between short-range and long-range information revealing physical properties of the crystalline and amorphous materials.

We are pleased to announce that a forthcoming issue of *Journal of Geosciences* will be devoted to latest aspects of spectroscopic and crystallographic studies of minerals and crystalline materials.

We would like to invite submissions of your conference presentations to assemble a state-of-the-art publication on modern mineralogy, spectroscopy and crystallography.

Instructions to Authors and Microsoft Word manuscript template are available to download at the journal website, <http://www.jgeosci.org>, in order to facilitate the submission procedure. If you intend to submit a manuscript to the special issue, please, indicate your interest and send provisional title(s) of your paper(s) to the first guest editor by the **1<sup>st</sup> of October, 2019**. Manuscripts will be accepted for review until **31<sup>st</sup> of October 2019** and will be published online by **July 15, 2020** and printed soon thereafter. All manuscripts will be the subject of a standard peer review by at least two international specialists in the field. We are looking forward to your contributions to this issue.
